July 23, 1976

TO: Steve Bristow
Al Alcorn

FROM: Cyan *SA*

SUBJECT: Weekly Status Report for W/E July 23, 1976

Pay Pong - The central computer has been debugged and is working. The remote Pong is 80% checked out. Gene Landrum was up this week and we acquainted him with the project. We delivered one of the prototypes to Gene.

Phoney - Software debugging and checkout is continuing on demodulation of video phone signal. Solid state camera was evaluated and looks very, very encouraging. We plan to order one immediately. Work on processing circuitry continues.

Miscellaneous - We will generate a proposal for the pizza automation computer for Gene within one week.

Ron and Gary are on vacation.
