

TO: Engineering Staff, Marketing

15 July 1975

FROM: Steve Bristow

SUBJECT: STAFF MEETING AND GAME REVIEWS

The following are the results of the Staff Meeting held 7-14-75:

1. Estimated earnings of Qwakers is \$70/week in Salinas. Very good. We will continue experiment of mounting unit with fixed guns and compare.
2. Fish: Final delivery still open to customer. Hold further work.
3. Quadrapong: Mfg. is going to mount a Quadrapong in a CCT and see how it fits. It is a possible use of obsolete QP PCBs.
4. Skier will be named, "Giant Slalom".
5. Abrasive resistant plex is too expensive for cocktail table use.

Cabinet Reviews:

1. Astroturf: Tilt CRT back, move base of cabinet 4" down to raise top and control panel 4", make shelf with buttons flat, have shelf stick out 4" from front edge of cabinet making sure to recess buttons so that they don't catch when the shelf slides out.
2. Evil Knievel: Cabinet OK but a view of extra renderings using tooled handlebar is desired.
3. Tank 8: Shape OK. Control panel area looks good but should be made more resistant. Material should be fiberglass and a small dollar bill changer should be mounted in the top. The canopy unit needs no mirrors. It should be as simple in construction as possible. Due to corrosion on Octo's at ocean locations extra care should be taken to make the Tank 8 corrosion resistant.
